Subject: RE: Near term action on cross-federal communication - PFAS ATSDR Toxicological Profile to be released for final public comment

Thanks Peter,

The PFAS communication team has discussed this and will start to coordinate across the Agency and with Janine Cory, MPH at ASTDR.

Yes, thanks Tom. Communications on this are likely to be a significant challenge.

Subject: Near term action on cross-federal communication - PFAS ATSDR Toxicological Profile to be released for final public comment

Tom and Lawrence:

ATSDR (Henry Abadin and Janine Cory) has reached out to me to begin cross-Agency coordination on communications related to the pending release of their draft Toxicological Profile for PFAS for public comment.

The process for the document is as follows:

- 1) a non-public letter peer review (recently completed)
- 2) internal ATSDR clearance (currently ongoing)
- 3) **public release for a final 60 day comment period (anticipated release in November)**
- 4) final posting – TBD/spring 2018

You may recall that the document includes derivation of minimal risk levels (MRLs) for 4 PFAS (PFOA, PFOS, PFHxS, PFNA) that are ATSDR's "equivalent" to EPA's reference doses (RfDs).

Deliberative Process / Ex. 5

Note also that ATSDR is the first federal agency to derive toxicity values for PFAS other than PFOA and PFOS. All 4 PFAS are frequently found at sites of interest to EPA as you know.

As the public release of this draft final document is expected to be a communication issue for multiple program and regional offices, I am forwarding the request to you.

Kathleen and I would greatly appreciate being apprised of next steps as you move forward. Our PFAS toxicity workgroup is ready to help craft Qs & As.

ATSDR is expecting to hear from EPA as soon as possible.

Here is the contact information for ATSDR's communication liaison for PFAS:
